Seattle, WA, USA

Updated resume: <https://ihammerstrom.github.io/resume/>

Overview	Senior/Lead Forward Deployed Engineer who enjoys sales and working directly with customers to create solutions, looking to move into Sales Engineering. Embedded with clients to figure out what they need, present approaches, and build it with them. Very full stack, from low-level networking daemons to cloud web apps and LLMs.	
Skills	- Working directly with clients & presenting - Explaining technical work to non-engineers - Solution design & architecture review - Project management - Requirements scoping & prototyping 0 to 1 launches, and working in large preexisting products - Debugging in offline client environments - Direct-to-customer sales & fulfillment - Mentoring engineers & hiring	Python, TypeScript/JavaScript/React, Java/Kotlin, C/C++, Bash, Go - Web & mobile: React Native, Django, Flask, Node - Databases: PostgreSQL, MongoDB, Neo4j - Docker, Kubernetes, AWS, Cloudflare, microservices - Linux OS development & automation - Backend APIs & integrations (REST, GraphQL) - Networking: TCP/UDP, QUIC, DNS, TLS, HTTP(S) - Security, threat modeling, authn/authz - Integrating LLMs, ML and applied data science
Education	B.S. Computer Science (Data Science focus), Western Washington University - June 2016 ReactJS Quantum Degree, Next Academy - July 2019	
Company	Roles	
Orbis Operations 3/2025 - Present (Remote)	<u>Lead Engineer / Senior Forward Deployed Engineer (9/2025 - Present)</u> <u>Senior Forward Deployed Engineer (3/2025 - 9/2025)</u> - Networking & security engineering in data intelligence. TypeScript, Cloudflare, JWTs, video streaming, raw socket programming, distributed auth, GraphQL. - Sensitive, mission-critical projects directly interfacing with and presenting to clients. Scoping requirements with them, prototyping approaches, and seeing the work through. Project management and engineering strategy. - Debugging in client environments, sometimes without internet access, while conforming to their security standards.	
2 Startups / Other Projects 6/2022 - 3/2025 (Remote)	<u>Founder / Software Engineer – LocalPosters</u> - App converting event posters into calendar events via LLMs. Built with Python Django, React Native, PostgreSQL. Hired and managed a full-time engineer, launched iOS & Android. https://localposters.org <u>Founder / Software Engineer – EasySignal</u> - Financial recommendation subscription service (Node.js, React.js, MongoDB). Shut down due to low margins. Other: Learned C1 level of Spanish, DIY'd duplex into triplex, designed/built a backyard cabin.	
Amazon 10/2020 - 6/2022 (Remote)	<u>Software Engineer II</u> - Designed per-item Prime Badge data flow from Amazon.com to Buy With Prime checkout, used by merchants on their own sites (Java/Kotlin, AWS ECS). buywithprime.amazon.com - Built customer address integration used by millions of Prime members (GDPR/CCPA compliant). - Built React front-end metrics for checkout dashboards. Led Threat Model Assessments for other core teams.	
Microsoft 3/2020 - 10/2020 (Remote)	<u>Software Engineer</u> Implemented multi-stage approvals for RBAC in Azure Privileged Identity Management (C#.NET). https://learn.microsoft.com/en-us/entra/id-governance/create-access-review#create-a-multi-stage-access-review	
Tableau Software 9/2019 - 3/2020	<u>Software Engineer Contractor</u> - Built web app (Python Django + React) for running tests in Docker on AWS. - Built test-finding service using Neo4j dependency graphs for GitLab PRs. Reduced developers' test time from 2+ hrs to ~30s.	
jcat.bike 3/2019 - 4/2022	<u>Founder / Software Engineer</u> - Founded a folding bicycle company while traveling overland from Scotland to Singapore (https://jcat.bike). Manufactured in Tianjin, China. - Built Python Flask/React web app with Stripe. Direct-to-customer sales, online and in person in Seattle, plus advertising and fulfillment.	
F5 Networks 6/2016 - 6/2018	<u>Software Engineer II (9/2017 - 6/2018)</u> - Networking microservices in Golang on Docker/Kubernetes/AWS. Duplicate address detection daemon in Python. Security Ninja: reviewed other teams' threat models. <u>Software Engineer I (9/2016 - 9/2017)</u> Python daemon syncing config data to L3 routing daemons. C codebase bug fixes on custom Linux OS. <u>Software Engineer Intern (6/2016 - 9/2016)</u> - Built a transcompiler in Python to convert legacy routing configurations to modern format.
