More details at https://www.linkedin.com/in/ihammerstrom/
Seattle, WA (open to relocating)
Updated resume: https://ihammerstrom.github.io/resume/

**Overview**

Senior/Lead Forward Deployed Engineer who likes owning a wide scope: embedded on-site with customers, figuring out what they need, presenting approaches, and building/deploying solutions end to end. Very full stack, from live drone video/telemetry and low-level **networking** daemons to cloud web apps, plus **computer security** (threat modeling, authn/authz) and **embedding LLMs** into products.

**Skills**

- Working directly with clients
- Explaining technical work to non-engineers
- Solution design & architecture review
- Project management
- Requirements scoping & prototyping
- 0 to 1 launches, and working in large preexisting products
- Debugging in offline client environments
- Direct-to-customer sales & fulfillment
- Mentoring engineers & hiring
- **Python, TypeScript/JavaScript/React, Java/Kotlin, C/C++, Bash, Go**
- Web & mobile: React Native, Django, Flask, Node
- Databases: PostgreSQL, MongoDB, Neo4j
- Docker, Kubernetes, AWS, Cloudflare, microservices
- Linux OS development & automation
- Backend APIs & integrations (REST, GraphQL)
- Networking: TCP/UDP, QUIC, DNS, TLS, HTTP(S)
- Security, threat modeling, authn/authz
- Integrating LLMs, ML and applied data science

**Education**

**B.S. Computer Science (Data Science focus), Western Washington University** - June 2016
ReactJS Quantum Degree, Next Academy - July 2019

| Company | Roles |
|---|---|
| **Orbis Operations**<br>3/2025 - Present<br>Seattle, WA (Remote) / Taiwan (on-site) | **Lead Engineer / Senior Forward Deployed Engineer (9/2025 - Present)**<br>**Senior Forward Deployed Engineer (3/2025 - 9/2025)**<br>• 4 months on site in Taiwan with a client: understanding their goals and systems (hardware + software), creating a solution with our technology, and deploying/debugging it in sensitive/restricted environments, often without internet access.<br>• Worked on client engagements: scoping requirements, prototyping, building, deploying and debugging on site, and supporting it after. Project management and engineering strategy.<br>• Hardware integration such as drones, bringing live video (RTMP/RTSP) and telemetry through a secure data mesh into **TAK**.<br>• Networking & security engineering in defense intelligence: **TypeScript**, **Cloudflare**, JWTs, raw socket programming, distributed auth, **GraphQL**.<br>• Pre-sales meetings with prospective clients alongside business development, showing how our technology could fit their systems. |
| **2 Startups / Other Projects**<br>6/2022 - 3/2025<br>Seattle, WA (Remote) | **Founder / Software Engineer – LocalPosters**<br>• App converting event posters into calendar events via LLMs. Built with **Python Django, React Native, PostgreSQL**. Hired and managed a full-time engineer, launched iOS & Android. https://localposters.org<br>**Founder / Software Engineer – EasySignal**<br>• Financial recommendation subscription service (**Node.js, React.js, MongoDB**). Shut down due to low margins.<br>Other: Learned C1 level of Spanish, DIY'd duplex into triplex, designed/built a backyard cabin. |
| **Amazon**<br>10/2020 - 6/2022<br>Seattle, WA (Remote) | **Software Engineer II**<br>• Designed per-item Prime Badge data flow from Amazon.com to Buy With Prime checkout, used by merchants on their own sites (**Java/Kotlin, AWS ECS**). buywithprime.amazon.com<br>• Built customer address integration used by millions of Prime members (GDPR/CCPA compliant).<br>• Built **React** front-end metrics for checkout dashboards. Led Threat Model Assessments for other core teams. |
| **Microsoft**<br>3/2020 - 10/2020<br>Seattle, WA (Remote) | **Software Engineer**<br>• Implemented multi-stage approvals for RBAC in Azure Privileged Identity Management (**C#/.NET**). https://learn.microsoft.com/en-us/entra/id-governance/create-access-review#create-a-multi-stage-access-review |
| **Tableau**<br>9/2019 - 3/2020<br>Seattle, WA (On-site) | **Software Engineer Contractor**<br>• Built web app (**Python Django** + **React**) for running tests in **Docker on AWS**.<br>• Built test-finding service using **Neo4j** dependency graphs for GitLab PRs. Reduced developers' test time from 2+ hrs to ~30s. |
| **jcat.bike**<br>3/2019 - 4/2022<br>Seattle, WA | **Founder / Software Engineer**<br>• Founded a folding bicycle company while traveling overland from Scotland to Singapore (https://jcat.bike). Manufactured in Tianjin, China.<br>• Built **Python Flask/React** web app with Stripe. Direct-to-customer sales, online and in person in Seattle, plus advertising and fulfillment. |
| **F5 Networks**<br>6/2016 - 6/2018<br>Seattle, WA (On-site) | **Software Engineer II (9/2017 - 6/2018)**<br>• Networking microservices in **Golang** on **Docker/Kubernetes/AWS**. Duplicate address detection daemon in **Python**. Security Ninja: reviewed other teams' threat models.<br>**Software Engineer I (9/2016 - 9/2017)**<br>• **Python** daemon syncing config data to L3 routing daemons. **C** codebase bug fixes on custom Linux OS.<br>**Software Engineer Intern (6/2016 - 9/2016)**<br>• Built a transcompiler in **Python** to convert legacy routing configurations to modern format. |
