|                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Overview                                                          | Senior Forward Deployed Engineer working directly with clients to figure out what they need and build it. Very full stack, with experience ranging from writing low-level L3 and L2 networking daemons in <b>Python</b> on <b>Linux</b> , to containerized <b>Golang</b> microservices on Kubernetes, backend development in <b>Kotlin/Java</b> , to full stack web apps using <b>React/React Native</b> , Flask, Django, MongoDB/PostgreSQL, <b>Docker</b> , <b>AWS</b> , and <b>TypeScript</b> with <b>Cloudflare</b> infrastructure. Including networking, security, and authn/authz. Integrating LLMs, building and launching products 0 to 1, and implementing features within large established products. Including mentorship and project management.  |                                                                                                                                                                                                                                                                                                                                                                                   |
